RECENT PROJECTS

Zenmak Global

Front-end development of a business website for Zenmak, a poultry science company. Utilised Gatsby's built in GraphQL API to request data from local JSON file for the Product display page, hence making the data updates easy.

URL – www.zenmakglobal.com
TECHNOLOGY – Gatsby.js | React.js | GraphQL | JavaScript

#Me2 – Social Platform

Developed a Social Platform for 'Meme Sharing" using 'MERN' stack. Developed the API using Express.js, GraphQL & MongoDB. Frontend is a React App. The app features Image optimisation using 'Sharp' on the fly. Built a simple meme generator using HTML5 Canvas.

URL – *yet to launch
TECHNOLOGY – React.js | Express.js | GraphQL | MongoDB | Node.js | Mongoose.js

Oxyville – Hotel Booking

Developed an online booking application with payment gateway and sms gateway integration. Created iCal export and import module to sync the local calendar with other booking websites like airbnb & booking.com.

URL – www.oxyville.in
TECHNOLOGY – Laravel | Voyager CMS | MySQL | PHP

Witco India

Minimal, Flat yet Stylish web design and development for Witco – luggage retailer. Custom CMS using Voyager, enabling the client to easily update the website page by page. Fully responsive development using Twitter Bootstrap.

URL – www.witco.in
TECHNOLOGY – Laravel | Voyager CMS | MySQL | PHP

PCKart.in

Developed an E-commerce store using Opencart with Custom PC building module. User can build and buy their desired PC online using this module. Product compatibility will be checked on each step and user will be presented with the right product.

URL – www.pckart.in
TECHNOLOGY – Opencart | MySQL | PHP
